## Product overview

The HD MTP/MPO adapter plates are made to fit all Giganet HD fiber management solutions, including rack mount patch panels, supporting MTP/MPO for high density solutions.

This MTP/MPO adapter plate can accommodate up to 6 or 12 MTP/MPO adapters with options of key-up to key-down, or key-up to key-up, which offers the flexibility to the MTP/MPO trunk to adapts different installation requirements with various polarities. The recessed adapters mounted in the plate gives the better bending radius when routing the MTP/MPO trunks cables.

Each MTP/MPO fiber adapter plate comes with protective caps made of polycarbonate to prevent dust and debris from entering.
